III. NEW TEMPORARY CHANGES - TEMPORARY CHANGES CORRECTED None.

IV. CHART CORRECTIONS ©

Corrective action affecting charts is contained in this section. Chart corrections are listed numerically by chart number, beginning with the lowest and progressing through all charts affected. The correction listed pertains to that chart only. It is up to the mariner to decide which charts are to be corrected. The following example explains the individual elements of a typical correction.

EXPLANATION OF FORMAT

Chart number	Reference Current Local	Chart edition of correction	Chart G BV	Edition Source Agency	Last Local Notice to Mariners	Datum Notice to Mariners
*19000 (Temp)	NAD 83	23 rd . Ed. (CGD14)		01/17/93		Last LNM 10/93 20/93
HI - ISLAND OF HAWAII - CHART TITLE - General Location						
Add Imaginary Harbor Light 4 Fl W 6s 42ft 6M						
19 30 00.0N 155 30 00.0W						
Corrective action			Object of corrective Position action			

The letter (M) immediately following the chart number indicates that the correction should be applied to the metric side of the chart only. A chart number preceded by an asterisk (*) indicates that the chart is the largest scale chart(s) that the correction appears on. When (Temp) appears below the chart number the chart correction action is temporary in nature. The letter (N) preceding the current Notice to Mariners number indicates a Distribution Limited (Not for Sale) chart (or publication) that is usually for U.S. Navy, government owned or chartered ships' use only. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (M).
